Quebec, Alberta, Manitoba, New Brunswick and British Columbia pension legislation permits LIF clients who begin a LIF in the middle of the calendar year with funds transferred from a LIRA or pension plan to take the FULL maximum payment for the year. First year payments under the other jurisdictions must be prorated based on the number of months the LIF was in force.

1. **Ontario New LIF, Ontario Old LIF, Ontario LRIF** maximum calculation is based on the greater of a) the result using the factor and b) the previous year's investment returns.
2. **Saskatchewan LIFs** must be converted to a life annuity at age 80.
3. **British Columbia LIF** maximum calculation is the greater of 1) the result using the applied factors and 2) the previous year's investment returns under the same LIF contract.
4. **Alberta LIF** maximum calculation is based on the greater of 1) the result using the new factors or 2) the previous year's investment returns
5. **Manitoba LIF** maximum calculation is based on the greater of a) the result using the factor and b) the previous year's investment returns plus 6% of the value of all transfers in from a LIRA or Pension Plan during the current year.
6. The minimum required withdrawal for all types of registered retirement income funds (RRIFs) has been reduced by 25% for the year 2020. Individuals who have already withdrawn more than the reduced 2020 minimum amount will not be permitted to re-contribute the excess amount back into their RRIFs. Tax will only be withheld if you withdraw more than your unreduced minimum amount.
7. For individuals under 71 years of age, Annual Minimum Payment for non-qualifying RRIF is calculated as follows: AMP = (Value of RRIF at beginning of year) x 1/(90-age).
